SSBT System

Launch process
Open a terminal

EUR
./ssbt/startup.sh eur

GBP
./ssbt/startup.sh gbp

Wallet System

Manual Launch process
If the needs to be launched manually, the script to execute is:

java -jar /home/optima/ssbt/ssbt-service/bin/ssbt-service-ice-0.0.1-SNAPSHOT.jar --spring.config.location=/home/optima/ssbt/ssbt-service/config/application-eur.properties

java -jar /home/optima/ssbt/ssbt-service/bin/ssbt-service-ice-0.0.1-SNAPSHOT.jar --spring.config.location=/home/optima/ssbt/ssbt-service/config/application-gbp.properties

Logs
/var/log/ssbt/sbbt.log

Configuration

application-eur.properties
application-gbp.properties

```

SSBT - Electron

Manual Launch process
Open a terminal
cd /home/optima/ssbt/electron-app
npm start

manual DEV Launch process
Open a terminal
cd /home/optima/ssbt/electron-app
npm run dev

The devtool is opened, and the console is display. Check possible JS errors

Configuration
The ssbt system include a configuration file to setup the below params:

- Screens path
- Users for the ICE (username, pass, currency, idmmcutomer
- Web socket URI
- Reconnection tries and timeout

path -> /home/optima/ssbt/electron-app/configuration.json

```
{
"home2" : "http://10.153.106.16/sports",
"home1" : "http://10.153.106.16/inplay",
"wsUri" : "http://localhost:8080/ssbt-websocket",
"user1": {
"username": "ssbt_1",
"password" : "Password1",
"currency" : "EUR",
"idmmcustomer" : "3166454"
},
"user2": {
"username": "ssbt_2",
"password" : "Password1",
"currency" : "GBP",
"idmmcustomer" : "3166455"
},
"connnection":{
"reconnectionTries": "50",
"reconnectionTimeout": "2000"
}
}
```

Known issues

Error	Solution	Cause
SSBT not logge	Restart SSBT	Sometime the login process is not working due to asynchronous problems in electron,
Grey filter applied	Restart SSBT	It's a way to detect when the SSBT is not connected with the wallet system. A reconnection feature is include in the file configuration.json `"reconnectionTries": "50", "reconnectionTimeout": "2000"`
Cache issue	Clear cache in electron rm -fr /home/optima/.config/ssbt/Cache	The electron internally is using chromium so the cache is stored in a proper folder
